Cyclazine Hydrochloride 50 mg Tablets

Read all of this leaflet carefully before you start taking this medicine because it contains important information for you.

Keep this leaflet. You may need to read it again.
- If you have any further questions, ask your doctor or pharmacist.
- This medicine has been prescribed for you only. Do not pass it on to others. It may harm them, even if their symptoms are the same as yours.
- If you get any side effects, talk to your doctor or pharmacist. This includes any possible side effects not listed in this leaflet. See section 4.

What is in this leaflet:
1. What Cyclazine Hydrochloride Tablets are and what they are used for
2. What you need to know before you take Cyclazine Hydrochloride Tablets
3. How to take Cyclazine Hydrochloride Tablets
4. Possible side effects
5. How to store Cyclazine Hydrochloride Tablets
6. Contents of the pack and other information

1. WHAT CYCLAZINE HYDROCHLORIDE TABLETS ARE AND WHAT THEY ARE USED FOR

The name of your medicine is Cyclazine Hydrochloride 50 mg Tablets. Cyclazine Hydrochloride Tablets contain the active ingredient cyclazine hydrochloride, which belongs to a group of medicines called antihistamines which can be used to help stop you feeling sick (nausea) or being sick (vomiting).

Cyclazine Hydrochloride Tablets may be used by adults and children aged 6 years and over. Cyclazine Hydrochloride Tablets may be used if you suffer from travel or motion sickness; nausea caused by cancer treatment (radiotherapy) or other medicines; or if you have had an operation, as general anaesthetics can sometimes cause sickness.

Cyclazine Hydrochloride Tablets can also be used to treat sickness caused by some inner ear problems such as Meniere’s disease.

2. WHAT YOU NEED TO KNOW BEFORE YOU TAKE CYCLAZINE HYDROCHLORIDE TABLETS

Do not take this medicine if:
- you have ever had an allergic reaction to cyclazine or any of the other ingredients of this medicine (allergic reactions include mild symptoms such as itching and / or rash. More severe symptoms include swelling of the face, lips, tongue and / or throat with difficulty in swallowing or breathing).
- you have been drinking alcohol. The anti-vomiting properties of cyclazine may increase the toxicity of alcohol.

Cyclazine Hydrochloride Tablets should not be used in children under the age of 6 years.

Warnings and precautions
Take special care with this medicine and tell your doctor or pharmacist before taking Cyclazine Hydrochloride Tablets if you:
- suffer from an eye disease caused by a rise of pressure within the eye (glaucoma);
- suffer from urinary retention (experience difficulty passing urine);
- have an obstructive bowel condition;
- have any liver problems;
- suffer from pheochromocytoma (tumour of the medulla of the adrenal gland);
- suffer from high blood pressure;
- have epilepsy;
- are a man and you suffer from an enlarged prostate gland (difficulty or slowness passing urine);
- have been told your heart is not working properly (heart failure);
- suffer from an inherited disorder which can lead to a sensitivity to sunlight (porphyria).

Cyclazine Hydrochloride Tablets and other medicines
Tell your doctor or pharmacist if you are taking any other medicines especially the following:
- medicines for problems such as depression, anxiety or difficulty in sleeping;
- strong painkillers such as pethidine;
- any medicine which belong to a group of medicines called anticholinergics.

Please tell your doctor if you are taking or have recently taken any other medicines including those you have obtained without a prescription.

Taking Cyclazine Hydrochloride Tablets with food and drink
Alcohol should be avoided when you are taking Cyclazine Hydrochloride Tablets.

Pregnancy and breast-feeding
You should not take Cyclazine Hydrochloride Tablets if you are pregnant or planning to become pregnant unless your doctor feels it is necessary. You should not take Cyclazine Hydrochloride Tablets if you are breast-feeding.

Driving and using machinery
You can drive while taking Cyclazine Hydrochloride Tablets but do not drive until you know how the tablets affect you. Cyclazine Hydrochloride Tablets may make you feel dizzy. If they affect you in this way, do not drive or operate any machinery.

Important information about some of the ingredients of Cyclazine Hydrochloride Tablets
Cyclazine Hydrochloride Tablets contain lactose. If you have been told that you have intolerance to some sugars, talk to your doctor before taking these tablets.

3. HOW TO TAKE CYCLAZINE HYDROCHLORIDE TABLETS

Always take Cyclazine Hydrochloride Tablets exactly as your doctor has told you. You should check with your doctor or pharmacist if you are not sure.

Adults
The recommended dose is one tablet up to three times daily.

Use in children and adolescents

Children over 12 years
The recommended dose is one tablet up to three times daily.

Children from 6 to 12 years
The recommended dose is half a tablet up to three times a day.

Children under 6 years
Do not give this medicine to children under the age of 6.

The tablets should be swallowed with a little water.

If you take more tablets than you should
Symptoms of overdose include dry mouth, nose and throat, blurred vision, fast or irregular heartbeat, difficulty passing urine, drowsiness, dizziness, lack of balance and coordination, weakness, excitability, disorientation, impaired judgement, hallucinations, muscle spasm, involuntary movements, convulsions, high temperature and difficulty breathing.

If you take more Cyclazine Hydrochloride Tablets than you should, contact your doctor or nearest hospital emergency department immediately.

Remember to take this leaflet and/or the package with you to show the doctor what you have taken.

If you forget to take your medicine
If you forget to take a dose, just take the next dose at the usual time, DO NOT take a double dose.

4. POSSIBLE SIDE EFFECTS

Like all medicines, Cyclazine Hydrochloride Tablets can cause side effects, although not everybody gets them.

If you notice:
- itching or skin rashes;
- swelling of the face, lips or throat;
- difficulty in breathing or wheeziness, stop taking the tablets and tell your doctor immediately. These may be signs of an allergic reaction.

Other side effects include:
- skin rashes or itching;
- drowsiness;
- lack of coordination;
- headache;
- a dry mouth, nose or throat;
- blurred vision;
- fast heartbeat;
- irregular heartbeat;
- difficulty in passing water;
- constipation;
- heartburn (reflux);
- feeling sick;
- being sick;
- diarrhoea;
- stomach pain;
- loss of appetite;
- restlessness;
- nervousness;
- euphoria;
- difficulty in sleeping;
- ringing in the ears;
- seeing or hearing things that are not really there (hallucinations).

Rare side effects include:
- decrease in muscle tone;
- unusual body movements, particularly of your hands, arms, or legs;
- muscle twitches, spasms or tremors;
