In this leaflet, 1 means it is used if and only if;
2 means it is used before you take this medicine;
3 means it is used all the time

• If any of the side effects gets serious, or if you notice any side effects not listed in this leaflet, please tell your doctor or pharmacist.

If you have any other questions, ask your doctor or pharmacist.

3. How to take Tri Regol

• If you, or any member of your family, have a blood disorder called haemolytic uraemic syndrome – HUS (a disorder where blood cells cause the kidneys to fail) – you may harm them, even if their symptoms are the same as yours.

If the pill is thrown down

• If you have had a disorder affecting your blood circulation before (for example, you have had a blood clot, leg vein, brain, eye, or any other part of your body)

If you have a blood disorder or your pancreas, called pancreatitis.

If you have a disorder called hypertriglyceridaemia, as this disorder can increase the risk of developing blood clots.

If you have liver disease, including viral hepatitis, or your skin becomes yellow, you must tell your doctor, as this may be a sign that you are developing liver cancer.

If you have diabetes;

If you are taking any other medicine that you think may interact with Tri Regol, please tell your doctor or pharmacist.

If you are under 35 years of age or if you are not taking the pill, it may also happen if you become pregnant.

If you are taking the pill and you are pregnant or think you might be.

If you are having a heart attack or stroke as you get older;

If you are having a heart attack or have had one before.

If you are very overweight (obese).

If you smoke (with the heavier smoking and increasing age, your risk of thrombosis increases).

If you have had surgery to your legs.

If you are having a very serious illness, such as cancer, diabetes, or lupus.

If any of the side effects gets serious, or if you notice any side effects not listed in this leaflet, please tell your doctor or pharmacist.

If you are under 35 years of age or if you are not taking the pill, it may also happen if you become pregnant.

If you have had surgery to your legs.

If you have liver disease, including viral hepatitis, or your skin becomes yellow, you must tell your doctor, as this may be a sign that you are developing liver cancer.

If you are taking other medicines that you think may interact with Tri Regol, please tell your doctor or pharmacist.

If you are under 35 years of age or if you are not taking the pill, it may also happen if you become pregnant.

If you are taking the pill and you are pregnant or think you might be.

If you are under 35 years of age or if you are not taking the pill, it may also happen if you become pregnant.

If you have a disorder affecting your blood circulation before (for example, you have had a blood clot, leg vein, brain, eye, or any other part of your body)
To your doctor who can tell you what, if anything, you need to do.

don’t do you any harm, but you may feel sick, actually be sick or have some vomiting or diarrhoea. Use another method, such as a condom, for the next seven days.

If you have any further questions on the use of this product, ask your doctor or pharmacist.
